SUMMARY

Full Stack Software Engineer experienced in building scalable, production-grade web applications serving thousands of users across startup, freelance and open-source environments. Strong foundation in Data Structures, System Design, and Backend Architecture, with expertise in RESTful APIs, Authentication Systems, AI/ML Integration, CI/CD Automation, Microservices Architecture, Containerization and Cloud-Native Deployments. Focused on designing high-performance, secure, and maintainable systems using clean architecture and engineering principles.

TECHNICAL SKILLS

Languages:	C, C++, Java, Python, JavaScript, TypeScript, SQL
Frontend:	React.js, Next.js, Redux, Tailwind CSS, Responsive Design, SSR, CSR, Performance Optimization
Backend:	Node.js, Express.js, Django, Flask, RESTful APIs, GraphQL, JWT Authentication, RBAC
Databases:	MongoDB, PostgreSQL, MySQL, Redis, Firebase
Cloud & DevOps:	AWS (EC2, S3, Lambda), Azure, Vercel, Docker, GitHub Actions, CI/CD, Nginx, Linux
AI & Data:	Scikit-learn, Pandas, NumPy, Matplotlib, NLP, Computer Vision
Tools & Practices:	Git, VS Code, Figma, Agile/Scrum, System Design, Code Reviews, API Security, Performance Profiling

EXPERIENCE

Web Development Intern — Geeks Kepler ***Nov 2025 – Jan 2026***

- Developed responsive, cross-browser web interfaces using HTML, CSS, and JavaScript following modern UI/UX principles.
- Translated design mockups into modular, reusable frontend components ensuring performance and maintainability.
- Collaborated in Agile workflows using Git-based version control and structured pull request reviews.

Open-Source Developer — GoFr and GSSoC ***Jun 2025 – Sep 2025***

- Developed scalable dashboard features and secure JWT-based authentication workflows for distributed web applications.
- Contributed production-ready backend APIs through structured pull requests and collaborative code reviews.
- Improved system performance, modularity, and documentation across open-source repositories.

Software Engineer — WeBuiltU ***Jan 2025 – Jun 2025***

- Led end-to-end development of a scalable MERN platform with secure JWT authentication and role-based access control.
- Implemented Docker-based CI/CD pipelines using GitHub Actions, reducing release cycles by approximately 40%.
- Optimized database queries and caching strategies, improving API response latency by nearly 35%.
- Led feature planning, sprint execution and technical decisions, improving platform performance, and overall user experience.

Full Stack Developer — Professional Freelancer ***Jan 2024 – Dec 2024***

- Delivered end-to-end full-stack solutions including secure Razorpay payment integration and JWT-based authentication systems.
- Reduced server load by over 50% through database indexing, caching strategies, and optimized REST API design.
- Managed cloud deployment, configuration, and ongoing maintenance ensuring scalability, reliability, and performance.

PROJECTS

QR-Based Ticketing & Real-Time Entry System **(GitHub | Live Demo)**

Tech Stack: *React, Next.js, Node.js, Express.js, MongoDB*

- Led a six-member team to build a scalable QR-based entry system handling 5,000+ attendees during Smart India Hackathon.
- Designed secure REST APIs and real-time dashboards with offline validation support, reducing check-in time by 30%.

E-Commerce Platform with Secure Payments **(GitHub | Live Demo)**

Tech Stack: *React, Next.js, Node.js, Express.js, MongoDB, Razorpay*

- Architected and deployed a production-grade platform capable of processing 6,000+ transactions with JWT and Razorpay.
- Optimized backend APIs and database indexing with caching, improving checkout performance and reducing latency by 40%.

Predictive Analytics Dashboard **(GitHub | Live Demo)**

Tech Stack: *React, Flask, Scikit-learn, Pandas, NumPy*

- Built a machine learning pipeline achieving 87% accuracy across 1,500+ records, integrating predictions into dashboard.
- Exposed optimized REST APIs for real-time model inference and automated workflows, reducing query latency by 25%.

EDUCATION

Bachelor of Technology (B. Tech) – Computer Science and Design **Oct 2023 – July 2027**

Galgotias College of Engineering and Technology, Greater Noida, India **CGPA: 8.03/10.00**

Relevant Coursework: *Data Structures and Algorithms, DBMS, Operating System, Computer Networks, Cybersecurity, Data Analytics, Cloud Computing, AI/ML, UI/UX Design*

ACHIEVEMENTS

- LeetCode Knight (Top 15%) – Solved 200+ DSA problems
- Smart India Hackathon Finalist – Led 6-member team to build scalable QR-based entry system
- Cleared NDA Written & SSB with All-India Rank in final merit list

CERTIFICATIONS

- MongoDB Associate Database Administrator
- Oracle Cloud Infrastructure AI Foundations Associate
- ISO/IEC 27001 Information Security Associate
- ISO 20000 IT Service Management Associate
- Professional Diploma – Software Testing & QA
- Professional Diploma – Web3 & Blockchain
- Google Analytics
- AWS S3 Basics
- Cisco Data Science
- Agile Scrum Master
- GitHub Foundations
